Hospitalization & Surgical Release

Owner/Authorized Agent _____ Pet's Name _____

Phone Number(s) (In case of emergency) _____

Type of Surgery _____

Our doctors and staff use only currently accepted medications and methods that have been proven safe. There is always some risk with any procedures involving anesthesia. Our goal is to keep those risks to a minimum. The doctors at Cornell Center Animal Hospital do a routine exam, but any additional information regarding your pet's health is helpful in making a sound pre-surgical evaluation.

Health information

Check appropriate box if you have noticed any abnormal conditions in your pet in the past two days.

Vomiting Diarrhea Abnormal Urination Loss of appetite Coughing Other _____

Pre-Anesthetic Blood Screen

We recommend blood screening test to evaluate how certain body organs, such as the liver and kidneys, are functioning before anesthesia is administered to your pet. Our hospital laboratory is fully equipped to perform these tests. Results will be available to your doctor prior to your pet being anesthetized. (Please initial one of the below)
